# School of Industry

## Course content

The School of Industry allows children to broaden their understanding of how jobs within the food, textiles and product design sector work, encouraging them to explore the different roles within these sectors to support their future career aspirations.

The course includes practical workshops in their chosen specialism; Food, Textiles or Product Design, alongside theory lessons in Business Studies. The pupils learn how to set up a business, and are given ownership of researching, developing and creating a business model for either a new restaurant, fashion, homeware or childrenswear brand. Pupils learn how to work collaboratively and challenge one another, and are taught how to confidently present their business plans in the Study School Showcase.

## Skills developed

- Research and inquiry into different ideas
- Development of design
- Manufacturing using a range of tools and materials
- Teamwork and collaboration
- Communications and confidence through presenting ideas
