

Further Learning is a key part of your child's development and strengthens the links between home and school. Please encourage your child to be an independent learner with their Further Learning.

English Challenge

This week we have been using our knowledge about time conjunctions to write instructions for the toys we made in class. Why not write out the instructions and share with your grown up? Could you make a toy at home and make the instructions for it?

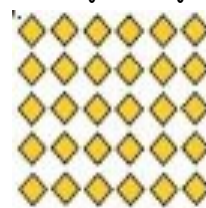

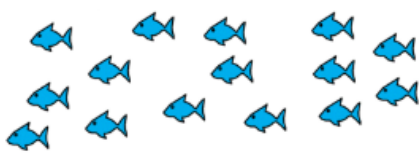

In Topic we have finished making toys with a moving part. We have had fun cutting, sticking, using split pins and painting our toys. Can you have a go at making a toy that you can share and play with a friend?

Maths Challenge

This week we have been looking counting numbers in 2s, 5s and 10s from 0-50, concentrating on how we count, read, represent and write the skipping sequences. We have looked carefully to notice the patterns of the numbers: 2' ending in even numbers, 5s ending in 0 or 5.

How many groups of 5 can you spot in each picture? Can you make a picture of objects to count?
