

Design Technology

*Design and Technology (D&T) is the inspiring, rigorous and practical subject which prepares all young people to live and work in the **designed** and made world.*

Course content

With current skills shortages in the creative, manufacturing and engineering industries, design technology is a crucial and valuable subject for young people to study across KS3 and 4. Pupils enter Year 7 with varying experiences of Design Technology, and so our projects are designed to introduce pupils to our subject area, and to build their confidence in using specialist tools and equipment.

Pupils will spend x10 weeks in different specialist areas, exploring textiles and product design, working with fabric and wood materials and developing their knowledge of the materials, tools and techniques.

Skills developed

- Analysing existing products
- Exploring the target market
- Creatively designing to meet specific criteria
- Making and using a variety of techniques and materials
- Testing and evaluating products

Topics covered

- Textiles
- Product design
